

Serial No.: 10/828,674

Art Unit: 3742

Attorney Docket No.: 2001P16124WOUS

Amendments to the Specification:

Page 1, replace the first paragraph below the title with:

-- Field of the Invention:

The invention relates to a cooking device with a muffle delimiting a cooking chamber, at least an upper heating unit, a hot-air heating unit, and a high-speed heating unit for regulating a high-speed heating mode and with a control unit according to the preamble of Claim 1.--;

between the first and second paragraphs, insert:

-- Background of the Invention: --;

Replace the third paragraph, with:

-- Summary of the Invention:

The object of the invention is to provide a generic device, in which advantageously enabling rapid heating while avoiding wherever possible undesirable burning of remains of food during said high-speed heating mode. This task is solved according to the present invention by a cooking device with a muffle delimiting a cooking chamber, at least an upper heating unit, a hot-air heating unit, and a high-speed heating unit for regulating a high-speed heating mode and with a control unit, characterised in that the control unit adjusts the high-speed heating mode exclusively when operating with the hot-air heating unit and at the same time switches on the upper heating unit the features of Claim 1, while advantageous configurations and further developments of the invention can be inferred from the independent claims.--

Page 3, between the third and fourth paragraphs, insert:

-- Brief Description of the Drawings: --;

above the last paragraph, insert:
